EDUCATION

Johns Hopkins University | Baltimore, Maryland

Aug 2025 – May 2026

Master of Science, Engineering Management | GPA: 3.6/4.0

Relevant Courses: Strategies for Innovation and Growth | Accounting and Finance | Data Visualization | Statistical Methods and Data Analysis

Leadership: Vice President- Finance for Johns Hopkins Product Management Club

Teaching Assistant – Data-Informed Strategy and Visualization (Tableau) and Reasoning with Data (Prof. Shadi Esnashaari)

Dr. Vishwanath Karad MIT World Peace University | Pune, India

Aug 2021 – July 2025

Bachelor of Technology, Computer Science Engineering | GPA: 3.71/4 | Received the Outstanding Student of the Year Award in Final Year

Relevant Courses: Machine Learning, Data Structures, Big Data, Design and Analysis of Algorithms, Software Engineering and Project Management

RELEVANT EXPERIENCE

Siemens | Copenhagen, Denmark

Dec 2025 – Jan 2026

Strategy Analyst Intern

- Managed end-to-end analytics workstream across 3 business functions; developed KPI monitoring framework with governance checkpoints, ensuring metrics were consistently tracked and reported against strategic targets
- Synthesized findings from 12 stakeholder interviews across Sales, Engineering, and Customer Service into a concise executive roadmap for C-suite review targeting an 11% cycle-time reduction
- Evaluated and prioritized 3 Agentic AI use cases using a value-vs-feasibility framework; led planning for AI workflow automation projected to deliver 21% productivity uplift

Trax Retail | Boston, MA

Oct 2025 – Dec 2025

Analyst Intern

- Built agentic AI prototype using shelf image and sensor data to detect out-of-stock items, cutting manual store checks by 80% for operations teams
- Designed a multi-signal model combining foot traffic, Shopkick, and shelf sensor data to flag availability issues 60% faster, improving store efficiency
- Validated product-market fit with 10+ store operations teams, positioning a premium AI-powered shelf monitoring offering for launch

Johns Hopkins Hospital | Baltimore, MD

Aug 2025 – Oct 2025

Strategy Analyst Intern

- Built and deployed a real-time operational analytics dashboard for staffing, patient flow, and OR utilization KPIs enabling leadership to self-serve daily reporting and reducing reliance on ad-hoc analyst requests
- Analyzed OR scheduling data in Excel and SQL to connect historical utilization patterns to future capacity risk; supported raising surgeon utilization from 65% to 77%, unlocking \$10M+ in annual revenue capacity
- Owned recurring reporting as the centralized analytics contact for hospital leadership, translating complex findings into plain-language insights and helping reduce surgeon idle time to 10%

Shipdelight Logistics Technologies | Mumbai, India

Aug 2024 – Jun 2025

Data Analyst Intern

- Queried and analyzed 1M+ shipment records using Python and SQL to surface cost-to-serve patterns and segment performance across a first-mile and last-mile logistics network
- Built predictive models using regression and time-series forecasting methods, contributing to a 12.7% revenue uplift and an 18% operational efficiency improvement
- Designed self-serve KPI dashboards with tech and operations teams, automating recurring reports and enabling consistent performance monitoring across partner segments
- Established weekly performance review cadence and presented margin risks and performance trends to the CEO and founders, shaping the go-forward operating model

RELEVANT PROJECTS

Enhancing Nursing Documentation Using LLM and Speech-to-Text Technology

Jan 2025 – May 2025

- Engineered an AI-powered documentation system (OpenAI APIs, Whisper) that cut reporting time by 99.8%, delivering strategic workflow efficiency for healthcare operations
- Achieved 94% clinical equivalence by optimizing dual-input workflows (voice + manual), demonstrating client-focused product strategy
- Conducted feasibility analysis and competitive research on EHR system integration, delivering comprehensive memos and presentations outlining implementation roadmap, risks, and ROI projections

Texas A&M University - International Research Program

June 2024 – July 2024

- Led development of predictive aviation risk models achieving 90.04% accuracy in high-stakes forecasting and analytical problem solving

SKILLS & ACHIEVEMENTS

- Business:** Go-to-market strategy, problem-solving, project management, financial modeling, business planning, negotiation
- Technical:** Python, R, Java, C++, C, Excel, Microsoft Office Suite, SPSS, SAP, Tableau, Power BI, JIRA, Hadoop, Spark
- Published Researcher,** Authored peer-reviewed paper “Deep Learning Strategies for Optimizing Customer Segmentation” (AMCIS 2025, Montreal, Canada ranked top 25% globally among submissions)
- Certified AWS Cloud Practitioner
- Languages:** English (Full Proficiency), Hindi (Full Proficiency), German (A1 and A2 level)
